White Panda

Physical & Mechanical Properties

Color: Striking White background with bold, contrasting black veining in flowing or linear patterns

Petrography: High-grade metamorphic calcitic marble

Water Absorption (by weight): ~ 0.18%

Apparent Density: ~2,730 kg/m³

Open Porosity: ~ 0.5%

Compressive Strength: ~ 122 MPa

Flexural Strength: ~ 14 MPa

Abrasion Resistance: ~ 2.0 mm

Mohs Hardness: 3-4

Thermal Expansion Coefficient: ~6.1 × 10⁻⁶ /°C

Frost Resistance: Medium (suitable for interior and mild exterior use with sealing)
